Thread: [Looking to sell OVH Server with Game Protection and 32 IPs](#)

SIM-2696481 - May 18, 2021, 4:59 am

Hello,

I'm contract bound to OVH (till 16.06.2021) with a Game Server that costs me around 120€ per Month and I'm not using it since I have another provider.

I would like to sell this Server to someone till 16.06 for 25% of the Original price (90€)

Specs:

CPU

AMD Ryzen 5 3600X - 6c/12t - 3.8 GHz/4.4 GHz

RAM

64 GB ECC 2666 MHz

Data disks

2×500 GB SSD NVMe

With the Server are included 4x /29 Public IP Blocks (all 8 are usable) so total of 32 IPs
[contract=tid]Start Contract[/contract]

~[DogiD]~ - May 18, 2021, 5:08 am

I am curious, why did you need 32 IP for a Game server?

Good luck for selling

The server was used for about 7 Months for VPS Hosting, so I needed multiple IPs, they are paid only one Time and are "free" as long as you pay for the server.

Does it have support for KVM? Some dedicated server hosts don't allow it or it's an extra.

Maxorg - May 23, 2021, 12:36 am

What type of game server did you previously host on this?

Possibly interested, how is it going to work since don't you still have to pay a monthly fee since it's a contract?

Are you planning on paying €120 yourself and then the buyer pays €90? Not 100% sure how that is going to work out.
