Thread: [Need Testers/Staff for Minecraft Server in Development](#)

TB12 - May 20, 2021, 6:01 pm

I have been working on a prison server for Minecraft in the name of The Brotherhood that still will take some time to finish. However I am in the need for testers who can help me regularly test things I am configuring and give feedback on the different aspects of the server. I also will be needing staff, however I am in no hurry to just hand it out I need to know you are capable and trustable.

If you are interested in helping me out and testing the server post below. Trusted members only

Hello I can help, I am used to being staff in Minecraft servers. I don't know if your server is quite big, but the most popular server I have been staff in had around 5000 players in average. You can send me a message if you are interested in my help. My minecraft username is NotLucas_.

Yeah I don't need any developers only testers and staff, if you'd like to test I'll let you know when I got something!

Ok sounds good, just reply to this if you need any help from me by the way, anyways good luck with

your server.
