Thread: [Cloudflare Bypass - Paying well!](#)

bhsu - May 21, 2021, 4:37 am

Hello Guys.

We're currently looking for a Method, or somebody to hire that resolves the IPs behind Cloudflare.

We're paying in Crypto, and we would be willing to negotiate about prices.

Just send us offers about private Methods, Hire Fees or anything like that really.

Have a good one!

Can you send me 1-2 examples? I think I can do this.

tiktoker - May 22, 2021, 12:37 am

What do you exactly want? To visit the website that has cloudflare to bot something on it? I have a method for that

bhsu - May 31, 2021, 3:04 am

Push - Still looking for Method or as a Service!

threatactor - May 31, 2021, 4:59 am

So if im reading this correct you want a tool that can pull the origin IP that is sitting behind cloud flares WAF?

I can help you to hack admin panel. There are many ways to hack a database of file and when we hack database then we have get access on file and finally we can get account information.

We mainly use two methods to hack a database:

(1) Mysql injection : We can use this injection to attack data-driven applications, in which malicious SQL statements are inserted into an entry field for execution and after that we get access on database.

(2) Web shell uploading : In this method first of all we have to find bug of target website and after bug filtration we have to create a payload and upload webshell with password encrypted. When we upload webshell successfully then we get access on database and after that you can get account information. Hit me my telegram I'd-@ustechybuddy

you need to digging deep information about its webs history, if that webs using wordpress it could

be better to track pingback url.
try send me your domain name, i will test it

turrach - June 6, 2021, 1:40 am

no, you cant do that
you can olnly copy/paste text from internet - thats all you can, looser
