Thread: [Looking for a coder that could code a good looking GUI. Paying 150-250\\$](#)

Flaxman - May 21, 2021, 1:01 pm

Hello. I am in need of a coder that could code a GUI.

The project should contain:

Good looking Dashboard
Working buttons etc.
Real time data update from BTC/ETH prices

Something simple like this (The picture is more detailed then what I am looking for):

Lmk via PM if you can do it.
[contract=tid]Start Contract[/contract]

Seems like you're wanting a bit more than a UI if you're wanting real-time / SignalR updates and "working buttons" (which i assume you'd want actions hooked into if they're "working")

Shoot me a PM we can discuss what all you need and the price.

Also, do you want this done in C# or is this going to be a web panel?

This is going to be an exe file. I am not requesting many functions. This is going to be a spoofer application to bind trojans with.
