Thread: [VULNERABILITY IN VPS HOSTING - 40 1 GBPS SPOOFED SERVERS IN MINUTES](#)

**Doomslayer** - May 22, 2021, 10:22 am

I have found a vulnerability in a hosting which will get you root access to 30-40 VPS 1 Gbps servers in minutes. No knowledge is required and I have built a tool that will do it for you. These servers usually have 2-4 cores with varying amounts of memory. The host does not care much about bandwidth abuse so you can use any scripts/scans. These servers rarely die but you can always rescan if they do.

This has been working for several months and I have never gotten less than 30 servers.

Please send offers in dms. I will send proof of this vuln once I receive a serious offer and the buyer sends proof of funds. Please don't waste my time.

Payment in crypto only.

PS: These are not the servers I sell

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley

Is this one hosting or multiple? Also if it one host, is the hoster a older host?

**Doomslayer** - May 29, 2021, 10:41 pm

One Hosting. Relatively new host.

Highest offer is 600. There was an offer for 700 but the guy was a time waster.
