2. No sharing of the software with any other clients
3. The developer is not responsible for any damage caused by this software
4. TOS may change anytime
5. By buying you agree to all TOS

SSlide - May 26, 2021, 7:44 am

The seller speaks very good English, will help you if there are any issues and is super friendly imo. 10/10 for the seller.

The worm is probably the best you will find for the price, it does everything as advertised. I would give it a 10/10 overall! Highly recommend buying!

Comrade - May 26, 2021, 8:17 am

are you giving any vouch copy?

if yes, i will take one...looks good.

zxPhantomBlade - May 26, 2021, 8:36 am

I can vouch. This is the guy that makes our Discord worm. We give him features and he codes em in. We needa pay for v3 source update still but ye its legit. This is a commission me and Melted paid for.

SIM-4704770 - May 27, 2021, 6:54 am

This is a rly neat concept, but pricing it at 175 is imo overcharging for just basic features that everyone have at this point, just going onto github and pasting shit can make something like this in less then 2 hours. I already have everything here is repos I made for separate projects, if I did this, I would sell for around 50 lifetime probably, not something like 175. Hows the runtime on the file too?

zxPhantomBlade - May 27, 2021, 7:41 am

Hey yeah thanks for your feedback and I understand what you are talking about.

This is a runtime scan, just ran it with putty.exe

<https://dyncheck.com/scan/id/e28befa0a4d5622ed697a254f9091535>

memory - May 27, 2021, 9:56 am

Epic release! Would love to take a look at it if you have any additional vouch copies available. Not interesting in actually using it in the wild, but mostly just to learn more on the programming side.

Thank you in advance,

zxPhantomBlade - May 27, 2021, 11:04 am

Did you encrypt it because from what I know we use the same source and ours is like 30.

zxPhantomBlade - May 27, 2021, 4:55 pm

Nope just removed the defender bypass since it triggers most of them. And removing it still bypasses defender so its not a big deal and also your version is the old one

allnay - May 28, 2021, 2:05 am

definitely interesting I'm gonna keep an eye on this ...
maybe buy in the future :D

Comrade - May 28, 2021, 10:10 pm

Review of the software after using it for 3 days:

1. Software: 9.7/10 I have tested this software for around 3 days (i.e. 72 hours). Seller gives you HWID generator. By using which you will generate the HWID for your system & seller will register this ID to his authentication system. So, i guess, byer won't be able to use the software on more than one system which is fair in my opinion. Once, this HWID registration procedure is done, you will be provided with valid working builder(Exe size = 3.50mb). You have to generate the worm bin using this builder. Worm is working as its being advertised. It's USB spread & RAR/ZIP spread features are awesome.....bin size = ~2.80mb. At the moment, worm is not FUD but it has fairly low detection rate. But in future, you will surely need a crypter to crypt the worm bin. And as the seller explained me, any .NET or native crypter will work with this software.

2. Seller: 10/10 The seller is friendly & super supportive with lots of patience. He helped me by explaining exactly how his software works. Also, he tried to resolve all my queries regarding the software. His official discord address is mentioned in the sell thread on which buyers can contact him anytime. And as soon as he online, he will reply you.

3. Support: 10/10 Well, i do not know him personally. But i am in contact with him from last 3 days regarding this product & my queries related to this product. And the fella tried to resolve each one of queries. He is supportive. He said he is focused on this project & will run this project for longer time. So buyers can expect some program updates in future. He already provided me a super small update of the program in last 3 days.

4. Price: 10/10 Well, if you would personally ask me, 175\$ is slightly higher price to pay for someone who is on tight budget & wants quality spreader. So, i have requested the seller to decrease the price little bit so more and more people can afford the product. Which will automatically increase the sales of the product. But that's a just a request from my side to him as i am not the product owner/co-owner.

Overall Rating: 9.7/10

Hope this will help some of the fellow members who are interested in this software.

Comrade.

justalemon - June 5, 2021, 6:56 pm

Vouch for Phantom blade, always helping and such a good dev! Keep doing awesome stuff bud!
Thanks again

LogiTech - June 14, 2021, 12:48 pm

Seller is not selling a managed product. DO NOT BUY. It is now just a source code placed in a RAR file protected by the password "12345".

Seller has lied by omission, and blocked me on discord as soon as I asked for a refund. I'm currently working up the dispute thread and PSA.

LogiTech - June 14, 2021, 1:15 pm

(Jun 14, 2021 01:09 PM)zxPhantomBlade Wrote: [\[CITE\]](#) You are saying its only source code placed in a RAR which is literally the builder. If you would have taken 1 minute looking into what I have sent you you would have known. So basically after the purchase and after you have all the code you suddenly ask for a refund. Interesting... and of course I will block you. I don't have to waste my time with people like you

No shit sherlock. Of course it has the builder in it. Look at you trying to weasel your way out.

Why haven't you answered my questions?

stargazing1 - June 15, 2021, 7:04 pm

vouch for this, have gotten multiple mass dms from people infected lol.

CrucialFawn12402 - June 17, 2021, 11:54 am

very very interesting.....

LogiTech - June 17, 2021, 8:59 pm

It's just the source code. He's been selling the build to others for \$300 each update without the builder. Some features cause BSOD or don't work at all.

Anyone who needs irrefutable proof PM me. I got it it all.

LogiTech - June 17, 2021, 9:38 pm

(May 27, 2021 06:35 AM)Jumpy22 Wrote: [\[CITE\]](#) I can vouch. This is the guy that makes our Discord worm. We give him features and he codes em in. We needa pay for v3 source update still but ye its legit. This is a commission me and Melted paid for.

^Explain the quoted above? I don't need one. I already got the information. I just want you to keep running your mouth so you look stupid in the dispute section. I've already compared what I have to what Melted has.

Oh I took more than 2 seconds. As a matter of fact since I own the source just like you said, and since there are no terms of services to violate, (Screenshots taken so an edit won't help) Slither is in possession of the builder. I've been watching the slither discord group (Which you seem to be no longer apart of) and talking to to the HF user Melted. Charging him for every update? While you sell the same thing here? You're a POS dawg.

Don't. Waste. Your. Breathe.

I'm sure you will have forgotten all of the above too. Playing dumb am I right?

BUYERS:

Do your homework and PM me for additional information or questions, so you can make an informed choice.

LogiTech - June 17, 2021, 9:42 pm

(Jun 17, 2021 09:40 PM)zxPhantomBlade Wrote: [\[CITE\]](#) See you have no idea what you are talking about. My worm and melted's worm are two different ones. They have some similar functions but they are still not the same. Not responding to you anymore stupid talking with 12 year old children on hackforums which don't understand anything

No, they're not. I was literally in the Slither group WITH you. And you didn't even notice. I found out about Melted by simply going through your contracts and HIS POSTS requesting a coder for a worm. Then from there I messaged him.

And that's exactly how I found out what you were doing.

Once again, potential buyers proof is available. PM me.

LogiTech - June 17, 2021, 9:49 pm

(Jun 17, 2021 09:45 PM)zxPhantomBlade Wrote: [\[CITE\]](#) So what am I not allowed to code for anyone else or what? U realize ur talking stupid shit right?

So now you know what I'm talking about! Great!

You weren't coding for anybody. Melted was paying out the ass for the same exact thing you're selling here. We compared it. And IF you did any coding at all past a very basic skill level, it was copy pasted. Which is heavily apparent as you didn't even bother to remove the comments in the code.

I see where you updated the TOS 8 minutes ago xD

T.O.S

1. No refunds
2. No sharing of the software with any other clients
3. The developer is not responsible for any damage caused by this software
4. TOS may change anytime
5. By buying you agree to all TOS

Just making note of this and the time edited in case you try play stupid games. Which is apparently what you spend your time doing. Hey man I got my I's dotted and my T's crossed. It's much easier to do when you're doing the right thing.

If you were doing the right thing, I wouldn't even be here. I know you understand that.

Stanley - June 21, 2021, 11:49 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
