BlockFi is like a bank account that you can purchase Cryptocurrency, hold it, and get paid more Cryptocurrency. It's like mining without the hardware!

I've been using BlockFi to earn interest and buy crypto. They also offer low-cost loans. Sign up using this link and we both get a bonus! [BlockFi](#) [warn]

Blockfi also fucked up their promotion massively by crediting BTC instead of their stable coin to customers..

Not sure if I'd trust a company which fucks up so hard when there are better decentralized options.

Also, remove your ref link, it's against the rules.

Do you do defi farms?

Been looking at some, do you know if there are any where you are able to keep custodial of your coins?

Here are several: <https://defirate.com/lend/>

Compound, Aave, dYdX, Maker and Fulcrum are decentralized.

Here are tutorials for DeFi Yield Farming: <https://defirate.com/earn/>

Then there's also Waves which a lot of HF users like: <https://waves.exchange/>

Here's a big waves discussion: [Waves is a BUY](#)
