Thread: [ISO Apprentice Designer](#)

Camf ? - May 25, 2021, 3:48 pm

Hey, Looking for an apprentice/beginner designer. Someone who may just be starting, or has only a few years of experience.

Requirements:

- the ability to work well with a team (team meetings, team communication through telegram/slack)
- ample free time
- self-motivated
- creative thinker who can work with a minimal description sometimes - not always (Looking for someones genuine motivated creativity)

Pay:

Set monthly salary (pays for the internal work on our agency and projects) + project commissions on client work

THIS IS NOT FOR YOU IF...

- You are just looking for an extra gig or some pay.

THIS IS FOR YOU IF...

- You want to make good money while growing with an agency chasing million dollar revenues over the next 2-3 years.
- You want to settle into a long term job that is 5-10 years commitment

What will you be doing?

Social Media content creation, Logos, clothing designs, threads (and others but those 3 categories are the main things)

I'm not looking to hire someone who owns their own agency, I'm looking for someone who wants to grow together with my agency.

If this is you, reach out, and let's work!!

- Colby

some notes...

- A lot of our social media content is created in canva, we will pay for your premium membership, we also have memberships to premium resources.

- If you have skill in simple video design using online editing tools like Zubtitle and similar video editors is a PLUS

- You will need your own photoshop, otherwise I can provide cracked versions of premium software. (if it becomes an issues Ill buy it for you)

Is Photoshop required, or can I use another program?
