Thread: [Any free VPN's that support port forwarding?](#)

iTech - May 29, 2021, 3:29 am

Does anyone know a VPN that supports port forwarding? I tried hidemy.name and changed the settings but the ports were still closed even though I was successfully connected to the VPN and had opened them in the settings.

Its always best of you spend the money on your own vps and do your own port forwarding. [Tutorial Here](#)
