I didn't scam this guy, you can see my completed work here:

Code: <https://hackforums.net/showthread.php?tid=6011863&pid=60697649#pid60697649>

I made a new thread to remove my HTML/CSS service because the work gets easily wasted specially when people don't understand.

Anyways, to everyone reading this, you can look at my old threads to see the reviews about my service:
