(Jun 6, 2021 12:08 AM)Comrade Wrote: [\[CITE\]](#) Review of the software after using it for 2 days (48 Hours):

1. Software: 8/10 I have tested this software for around 2 days (i.e. 48 hours). Seller gives you WebPanel URL & Login Credentials. By using which you will login into the WebPanel. WebPanel is pretty basic. It does not have many fancy options. I guess, seller might be working on the Panel. Because, i found few small bugs inside the panel (which aren't so important but it needs to be fixed.) Seller also provides you 2 BINs one for XMR mining & one for ETH mining (Exe size = ~2.3mb). At the moment, BINs are not FUD but it have fairly low detection rate. But in future, you will surely need a crypter to crypt the those bins. After the execution, BINs dropped into the temp folder of the current useprofile. So, i guess, it won't run in the memory at the moment, but seller might add RunPE in future (its my guess, i dunno about his plans at this moment.)

2. Seller: 9/10 The seller is friendly. I don't have his discord or telegram but he gave me prompt replies to my messages on HF Conversation protocol.

3. Support: 9/10 Well, i do not know him personally. But from our conversation in the last 2 days, i

think, seller will provide a good support to the customers.

4. Price: 8/10 Well, if you would personally ask me, 135\$ (for lifetime membership) is slightly higher price to pay for someone who is on tight budget & wants quality Cryptocurrency Miner. So, i guess seller should decrease the price little bit so more & more people can afford the product. Which will automatically increase the sales of the product. But that's a just my opinion as a reviewer since i am not the product owner/co-owner.

Note: I no longer have access to the product as my review period of 2 days is over & seller terminated my review license.

Overall Rating: 8.5/10

Hope this will help some of the fellow members who are interested in this software.

A couple of questions. Are these features available?

Download & Execute?

Crypter needed?

How can we be sure we aren't spreading your file binded to ours?

hey thanks for the question!

Yes there is download & execute

Also I'm not in the game for mining or spreading my stuff, I'm here to make software and sell it.

Yes you will need a crypter

He was really understanding. I can't wait to work with him in 5 days. Thanks

whocares - June 22, 2021, 9:46 am

what is the use of the free vps for the miner?

nouratowel - June 25, 2021, 10:01 am

Seller is professional and quick to reply, willing to help beginners setup his product as perfectly as possible. Very helpful, highly recommended

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first

post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
