Thread: [Warzone guns & attachments](#)

anyone know a tool or service that unlocks all the guns/attachments for a new warzone account?

i would recommend not using any tool and just buy a aged account which is typically less than \$1

reason being the tools i have seen are account locked meaning it only works for the account you use it on, if you want unlock all on another account you would have to buy another service for the other account

[Liam](#) could sell you a cracked account. I received a vouch copy for an account before and it came with damascus camos unlocked and pretty much all guns maxed.

how do you find aged accounts for less than \$1? I keep paying \$3 for fresh new accounts with no guns.
