Thread: [Giveaway: Reseller Web Hosting](#)

SIM-2984662 - June 1, 2021, 8:30 pm

Just started up a webhosting project and thought doing a giveaway would be a good way to bring it some attention

The giveaway will take place on HF but you will need to make an account at [member.hostcode.dev](#) to receive

I will be giving away 1 month of our Unlimited Reseller Webhosting.

I specifically chose to give away this plan so the winner has potential to profit (Hopefully become a customer as well)

All you have to do is leave a reply on this post (LQ Posts will not be entered)

Good luck everyone?

[member.hostcode.dev](#)

The URL doesn't have any page, it shows Index of/

All the best with the web hosting project. xD It's hard to make a stable business or make a profit in 1 month. xD Any chance of getting it for 6 months? Just curious.

Good luck!

In the process of reworking the whole website, due to lack of interest giveaway is postponed until further notice (At least until website is back in working order).

I will take your comment into consideration, but you have to understand a giveaway is free so any money made is already profit. If the future winner understands business or even just SEO; a month is plenty of time to get them started, one sale can be enough to pay for a month of reseller hosting if they chose to continue.
