Thread: [Good free keylogger to recommend me ?](#)

dfghjk - June 2, 2021, 3:16 am

Anyone has a good free keylogger to recommend me ? That can bypass some antiviruses ?

Thanks

you wont find anything that is free that will bypass antivirus, the thing is all the free ones are detected now, because they read the code and take snippets, you may be able to find on github and change the code. Just do a google search of keylogger github and some will come up

Hello, sorry for the late reply. Do you have one to recommend me specially ?

Thanks

I've been told also that buying a keylogger is the best way forward, unless you know how to fully code one yourself. They're not usually expensive.

I don't guarantee that it's completely FUD but you could try Viotto Keylogger for free (it's from R3mc0s RAT developers)
