Thread: [\[FULL SOURCE\] CPA landing pages with niches | Easy to modify](#)

V.V.V.V.V - June 3, 2021, 2:42 pm

Hello,

Im going to sell two of my landing pages that I made a while ago. These have worked great for me and have used two niches with it, "BH" ones.

Selling full source on everything. Has also made it very easy to modify to your own taste and to use the same setup on almost every niche you can think of.

I myself chosed to use snapchat and onlyfans as niches and these are the two this package comes in.

Everything is written in:

- JavaScript
- Ejs render [pure javascript]
- HTML, css

Backend is made with express connected to MongoDB so it is very basic.

The reason why I sell this is that I do not have time or do much with CPA anymore and have more switched to Affiliate marketing and other methods that suit me better at the moment.

So instead of these just lying around and not being used, I think that someone else can certainly make a nice income with it.

The price is: \$30 and then both packages are included.

The templates for the offer/paywall also included.

BTC and ETH only.

Basic support is included. However, I will not have the time or energy to install this on a host for the buyer. If you do not have knowledge of how to set up a basic website, refrain from this or make sure you have the help you need before buying.

I can recommend a hosting that offers \$100 trial for 60 days.

VIDEOS and showcase of appearance and features:

SnapAttack:

Payment received using these landing pages:

The two first payments I got traffic from Facebook, Instagram, reddit Youtube and Discord.
The smaller payments is set and forget Youtube videos.
