Have you ever farted and ended up shitting yourself?

One time I was sick & at the doctors office. I had to fart so I went for the fart ended up pooping and I ran to the nearest restroom and threw away my boxers. Flushed it down the toilet and called my girlfriend, & she laughed at me :(

I mean, you're lying if you say you haven't done it.

So yeah it has happened, nothing to be ashamed of, happens to the best.

When I drink too much, I tend to misjudge a fart and shit myself the morning after.

This happens far more often than I would like to admit.

I think some people believe shitting yourself is way more common than it is.

Isn't the term for this "sharting" LMAO?

?nxy - June 4, 2021, 6:54 am

yeah it happened to me this morning

Once when I was a kid.

But I fully trust my farts, they never shit on me :)

I know my body well enough to know what's coming. Came close, but no cigar.

Grinning from ear to ear reading this one.

For me I can usually can feel the potential, and I try some weird filtering technique to ensure it's air coming out and not shit. Haven't always been successful though

I thought I was the only one with that technique. It's all in the clench.
