Thread: [Selling Stake.com Plat 1-2 account!](#)

Palms - June 5, 2021, 9:38 am

Hello,

I'm selling my stake.com account in hopes to stop gambling. After all these years and money spent, I don't want my account to go to waste.

Currently I have a daily reload bonus of \$15 till June 16.

Monthly bonus still to come which will be MINIMUM 900 USD.

The account is currently Plat 1 but its 40% away from Plat 2 - which means you need to wager like just 50k to reach Plat 2 and unlock all the perks for it along with the bonus which u get upon reaching the next rank which is going to be around \$500 alone not including the wager bonus that u get along with it

It was created back in 2019 and it has a total wager of +550k USD (With todays crypto prices)

You get all data, Of course.

DM me for more details, there's no fixed price for it so i'll just accept the highest offer!

This guy is a scammer, be careful. First of all daily reload bonus is for plat 2 players and above.

Second \$900 monthly bonus is available only if you're Diamond +. For plat 1 you will get around \$50.

Nice scam attempt buddy.

I suggest you to calm down and dont trashtalk my thread when obvi u have no clue what u are talking about?

Can you read? I said the daily reload is till june 16 and u get it even when u are plat 1 - for 14 days as i've already mentioned.

Here's a proof

u are completely wrong with the monthly bonuses as well

Obvi you arent aware what the monthly bonus formula is so let me explain u how it works:

Basically, you get guaranteed monthly bonus + "x" % from ur monthly wagers which is equal to this
- bronze 1k wager = 1\$ on silver 1k wager = 1,2\$, gold 1k wager =1.5\$, plat1 1k wager = 2-3\$ (approx)

Here's a proof how much i've wagered since the last monthly bonus and what my weekly bonus was today:

Now you can shut the fug up

Next time do ur homework before trashing other people threads or calling me a "scammer" :)

I'm gold and my weekly bonus today was \$48 and some change lol. Last week it was \$70 something. Weekly bonus is based off of what you wagered during the past week.

I'm aware for weekly, I've gotten also \$200 + in weekly bonus but never gotten something close to \$900 monthly bonus even tho I got about \$1m wager. I guess he just wagered a lot this month.

That's what im trying to explain this dude who's calling me out a scammer when i basically posted the exact statistics and he can do the math lol.

Also the monthly bonus gives u more % from ur wagers than the weekly
