Thread: [Someone Targeting me on hackforums and no action from Mods](#)

Clow - June 7, 2021, 7:58 am

so today someone made account on HF try to destroy my reputation that i am trying to build here on hackforums since the first day i visited this site

he say that i scammed him 1k usd , and i am part of scamming group , i asked him to post proofs about what he saying but he keep jump on every thread i replayed in and make people think i am scammer , i am sure this act come from Multi-account for member was here called " Jack Spider " or something like that .

this started when i posted my show off for hacking big hosting company so this called " Jack " contacted me on TG and asked me to hack target for him and he will give me money , i told him that this target come to me before from someone i know and your not the real customer for this site , i went to his profile on HF and i found him saying to the real customer that he can hack this target so i leaved a replay there about this "Jack " that he pretend to be hacker then take the customers targets and send it to other hackers so in other mean he try to scam me to do the job for him then scam the customer with proof to take the money and just leave ,

for sorry i lost access to my TG as it was swapped number , not mine so i can't get the full conversation

my thread you will find this "Jack Spider" replay : [Hacked Hosting company](#)

i don't know what should i do now , i reported all his replays and threads with no effect

this is the thread he done about me : [Clow is big scammer who scammed me \\$1000](#)

sorry for my bad english

Oh btw i don't even have 1 usd not 1k lol
