Thread: [Problem with ByteCrypter and Async/ Quasar.](#)

testofy - June 7, 2021, 2:50 pm

I just bought ByteCrypter (3months) and I've tried multiple settings but I cant get it to work.

After I build a file in the RAT client it works, but as soon as it is crypting and I try to run the file, it does not work.

It does not connect.

Can someone help me? It would be really appreciated.

Take care

what rats are you using exactly there might be something in that said rat restricting the access.

Post Images of the settings you used from the Cryper and settings you used while making server from rat.

Must have your RAT misconfigured or the crypter settings are incompatible with your rat, vice versa. I may help you out just send me a pm ?

testofy - June 8, 2021, 7:41 am

Thank you for replying. I will post the settings I used for the QuasarRAT and the crypter.

Settings Used for QuasarRAT

I have now posted with pictures :)
I did not touch icon, file pumper or assembly either.

I HAVE A QUESTION TO ANSWER THANKS GOOD MORNING I WANT TO KNOW WHICH IS THE BEST CRYPTER IN THE MARKET BECAUSE I HAVE NOT FOUND A GOOD THANK YOU

Tequrz - June 11, 2021, 3:26 pm

Many people seem to have problem with Byte , makes it even better that the owner doesnt reply!

Yeah, I had higher expectations on this crypter.

He told me a few days ago that it would get updated yesterday which it didnt....

Its about as stealth as a free crypter. It gets detected so easily.

I'm almost certain Royal! is an hidden admin of HF , his crypter has been useless and outdated for years (when it works) but he's still selling it to newbies even if it's becoming a scam.

Thank you for your honesty. We share the same thoughts, feels like a scam.

He avoids questions and barely answer when I PM. Even after his "update" its still getting detected instantly by Windows Defender.

Hope that more people dont fall for this crypter.

What crypter do you recommend? :) A crypter that is stable and gets updated often and good
