Thread: [Oldschool Runescape Unbannable Macro Method](#)

yoyommgb - June 10, 2021, 1:02 am

Hey I discovered a method for macroing in OSRS around a year ago and have been using it ever since with 0 bans to date. Currently running 6 accounts on my laptop with it. It takes quite a bit of knowledge and steps to set up so i'd like to sell it in the form more as a mentorship type thing rather than a guide. I make a fair amount of money selling accounts from this method so I would like to keep the sales of this limited and I would also like to keep the ban rate at 0%. If anyone is interested feel free to pm or convo me i'll answer any questions you may have. I can set it up for you on teamviewer or walk you through it.

Price : \$500 any crypto or 1B OSRS gp

Thanks for reading and feel free to pm or convo?

Is this upgrading accs or farming gold?

For account leveling can be used with many different skills though. Could be used for a few methods for gold as well to be honest.
