That happened to my 11 pro max cause some condensation got in the camera and faceid sensor when the temperature dropped, so I just let it clear and took it to Apple and they replaced my phone for free.

Hell - June 10, 2021, 11:07 am

OnePlus 8T and iPhone 11 Pro Max

Wow do you think its too late to do this? It happened like a year ago.

FlyDi - June 10, 2021, 11:10 am

Motorola G8 Power, it is fine for me I hate apple products bro.

MarvinMalware - June 10, 2021, 11:10 am

Just recently (about a month ago) I grabbed an iPhone 12. It's been pretty nice, network speed and screen resolution is definitely an improvement from my last device.

I'm not sure it happened to my phone after having it for 3 months so maybe that is why they replaced it?

Sleep - June 10, 2021, 11:33 am

I bought the iPhone 12 mini recently. It's great.

[\$(5)\$] - June 10, 2021, 11:34 am

A Nobody - June 11, 2021, 4:26 am

The cheapest thing I could find at Walmart. Had to get it a couple years ago after my slider phone broke. I miss my keys...

Sick - June 11, 2021, 4:50 am

Samsung 21+ 512gb ..Really good phone . Buy new model every year

Joy™ - June 11, 2021, 6:30 am

An LG V20. It's an older phone, but I still like it for what I use it for.

2xTheTap115 - June 11, 2021, 7:30 am

In my case, it is an old and good samsung solid (B-2710).
It is perfect for calls and text messages:D

Kon6 - June 11, 2021, 7:51 am

I own an iPhone 12 Pro Max and iPhone XS. The 12 Pro Max for personal use, and the XS for work/business use.

ashish2112 - June 11, 2021, 9:08 am

Now I think only have these cheap Chinese Redmi Note 7 pro
Though they are like selling hot here in India

Lilith - June 11, 2021, 9:09 am

Rocking a beat to shit iPhone 6. I have a strong desire to go back to a flip phone though. Really tired of how centralized life is becoming on phones. They're awful.

TB12 - June 11, 2021, 9:42 am

I have an iPhone 12, works great for me

Beherit - June 11, 2021, 11:20 am

Just a stupid Motorola but will upgrade to a better Samsung phone in the future.

Crypt - June 11, 2021, 3:55 pm

I have the iPhone 11. I might end up getting an Android though, who knows.

wraxu - June 11, 2021, 4:28 pm

XS Max but I'm upgrading in September.

Utility - June 11, 2021, 4:31 pm

Some random LG phone that costs like 150\$.

Can't afford to buy an expensive phone with my work.

Astonished - June 11, 2021, 5:57 pm

I currently have a 128GB iPhone-XR.

I was quite lucky, nabbed it off of someone practically new for £300, bearing in mind directly from apple this costs £549 (inc. VAT).

I think the only negative at all was that the overall battery health was rated 96% ish? Doesn't bother me in the slightest.

No complaints about it so far.

I recently got the same phone and honestly I love it. I was using the 8 plus prior and it's been so nice not having a home button to press anymore, everything is faster with the facial recognition, better display, better battery, etc... I would have liked to get the latest iPhone 12 but I couldn't pass up the deal I got on my XR.

Are you in the US? If so, which BANDs are enabled on your Xiaomi device? I had one in the past that couldn't connect to but like 1 cellphone tower in my entire city due to not having the correct BANDs enabled.

HEISENPUG - June 15, 2021, 3:59 pm

Red iPhone 6S 64 GB. Its pretty good and no where near as laggy as my last android phone which is a plus.

Cap - June 15, 2021, 6:40 pm

I have an iPhone 11 Pro Max. It goes well with all of my other Apple products.

Mr. Moe - June 15, 2021, 6:52 pm

Same here, I'm quite into the Apple eco-system now so I probably won't leave. I love Apple Pay and all the things that just work flawlessly.

I'm curious what iphone 13 or whatever they release Fall of 2021 will be like. I'm expecting 120Hz to finally arrive to iPhones too so I might be upgrading. If I don't do it this year, probably the iPhone 14 is when I'm changing it.

I know this phone could push soo much more years, I just love tech and being somehow on the latest shit. Like, not the latest latest, but I don't wanna be left like 3-4 years behind if it makes sense.

ThinWhiteDuke - June 16, 2021, 7:53 am

iPhone 6S Plus that I've had for about 5 years, Decided my next phone will be a much cheaper brand, been looking at the Xiaomi Redmi Note 8T and I' really impressed

bignapoks - June 16, 2021, 7:56 am

Samsung A21S. In my opinion buying a 1k phone is a waste of money when these cheap Samsungs work perfectly.

The - June 16, 2021, 10:15 am

I just got an iPhone 11 Pro Max.
