Thread: [Looking for a good crypter with private stub or one-time crypts that isn't sold on hf](#)

Snax - June 10, 2021, 9:21 am

I've tried most of the crypters on hf but none of them stood out for me in terms of long-time fud or bypassed major av's including wd in runtime scans.

so I'm looking for a really good crypter with a monthly private stub or private crypts service.

I also need to mention that I don't need a referring to ANY crypter on here, but I need one that isn't sold on hf even if it's public somewhere else, and that doesn't mean I won't make a contract with the seller/referral.

if the member is not reputable enough, I will also do a TEST first by sending him my file to crypt it without adding startup to it, so I can check its compatibility and fud quality. here's my telegram if you wanna hmu: @cybor9 (send me your hf profile link when you do)
cheers.

[contract=tid]Start Contract[/contract]

You will most likely get scammed if outside hackforums. I wouldn't use anything on here personally i'd hire someone to code you a private product.

Snax - June 10, 2021, 9:47 am

I'll make a contract with the seller to dispute it in case he tried to scam me after my payment. and I'll do a test first to make sure his crypter is good enough for me.

nCoXo - June 10, 2021, 11:07 pm

it will be hard to get a free crypt, so I would suggest you to buy a Crypt from the seller to test out. Also main thing, you must post your budget.

Also main thing, you must post your budget.

it's just 1 crypt with no startup. I don't wanna pay \$25 and such to some random guy only to test the compatibility and fud quality of his crypter.

as for my budget, I already mentioned that the price should be affordable. i.e., similar or a bit higher than the ones on here.

actually all the crypt providers on HF have so many orders that there is a wait time of 24 hrs,

Example RAZ

i dont think they will give you a free crypt and they do sell Crypt for 25\$ and you are not paying anything extra to him.

Hop you get my Point.

Hop you get my Point.

yeah, that's why I said I'm looking for other sellers who either sell their crypters privately or sell somewhere else.

i can help you but i get payment first, also fud in runtime depends on how your RAT/Virus/File Acts

nCoXo - June 12, 2021, 9:56 am

cipher0100 - June 13, 2021, 11:50 pm

I am also looking for a exe crypter which can make my rat fud in runtime and scantime and i want it with private stub for every month.

nCoXo - June 16, 2021, 8:35 am

sorry for an off topic question, how you got that 5k bytes.

bellodipapa - June 17, 2021, 7:40 am

contact me in private i will help!

nCuX0 - June 18, 2021, 5:20 am

I can recommend mrlapis or ImComplexed from another forum, i cant advertise a competition forum so you need to contact me privately, you can click on my signature or profile to send me a dm

I tried mrlapis, his crypting can only bypass wd in runtime, not the other major av's like kaspersky, avast & such. and that costs \$500 per week for 1 crypt daily. as for ImComplexed, his pricing starts at \$1500 for 2 weeks of subscription to his crypter software! and no one-time crypts to offer, but he's the best, that's for sure.

neon_light - June 19, 2021, 6:36 am

I doubt that anyone would give you a free private crypt.

It's also a complete contradiction, if someone gives you a free crypt to "test" then the crypter isn't really private (since you could create lots of fake accounts and keep getting free crypts)

And the quality of the "private" crypter is going to be bad.

Snax - June 19, 2021, 12:48 pm

And the quality of the "private" crypter is going to be bad.

I wouldn't ask for a free crypt to test without having my file's startup disabled.

also, it'd be fine by me if the seller is reputable enough to pay him for the crypt then I'll check the runtime fud quality,

but he has to check my file first for compatibility with his crypter.

Stanley - June 24, 2021, 5:21 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

So you use a stealer, voila, work done.
