Thread: [Favicon IMG Request](#)

bk randy - June 11, 2021, 12:14 am

I made a site for Forza Motorsport / Horizon <https://www.jdm10.com/>

I need a Favicon for the tab, a Favicon is the imagine in the tab next to the domain.

I want something that includes:

JDM10

Maybe with some black and gold, or black and red, or black gold and red.

Like 2 stripes slanted right and the JDM10 in black with a gold outline? or red outline? whichever looks good.

Let me know what you can do, I really appreciate any help as this little project does cost a bit and I'm sure I won't get much out of it. Just playing around, but it could get some resell value idk..

anyway hmu with them pics :)

Gave it a little go, I haven't made a favicon before though. Hope it's alright.

It's not bad, but the Wix made me this one and I was kinda hoping for pretty much the same thing either with just a transparent background instead of black, or with that, and a change to the text, whichever looks best.

The black images are transparent, it's just how imgur displays them.

I'm not very good with matching fonts, I can send you the PSD if you want to have a play.

I meant to post that pic, that's the one Wix made me... Could you make the black transparent?

Sry... :s
