Thread: [Cheapest Port Forwarding VPN?](#)

iTech - June 11, 2021, 12:38 pm

What is the cheapest lifetime Port Forwarding VPN?

Cha0 - June 11, 2021, 12:52 pm

Don't cheap out on a good VPN.

I recommend <https://privateinternetaccess.com>

regenor32 - June 11, 2021, 2:38 pm

if you go cheap...you risk losing client and data logs. try nvpn

x_x - June 11, 2021, 2:54 pm

lol, you don't need to buy a vpn to open ports.

nCuX0 - June 12, 2021, 4:38 am

i can recommend airvpn, dont know anything cheaper.

recently i have seen portmap.io which offers free subscription but im not sure if it will work, didnt test it yet

SIM-3749878 - June 12, 2021, 4:43 am

Mullvad.net is the best VPN of all time, but it's not free.

nCoXo - June 12, 2021, 10:00 am

(Jun 12, 2021 04:43 AM)Sharky Wrote: [\[CITE\]](#) Mullvad.net is the best VPN of all time, but it's not free.

you sure it opens port?

SIM-3749878 - June 12, 2021, 11:43 am

(Jun 12, 2021 10:00 AM)nCoXo Wrote: [\[CITE\]](#) you sure it opens port?

Yes it does but you do not get to pick which port to open. One will be opened for you and you will then get to use it.

nCoXo - June 13, 2021, 10:54 am

(Jun 12, 2021 11:43 AM)Sharky Wrote: [\[CITE\]](#) Yes it does but you do not get to pick which port to open. One will be opened for you and you will then get to use it.

you mean it opens a random port.

SIM-3749878 - June 13, 2021, 1:00 pm

(Jun 13, 2021 10:54 AM)nCoXo Wrote: [\[CITE\]](#) you mean it opens a random port.

Yes, but you can open 5 at a time and freely remove open ports and open new ones to generate new open ports. Unfortunately you can not specify.

DI?E - June 14, 2021, 12:33 pm

Give torguard a shot. Never had an issue with them and they are fairly priced.

JackSailor - June 14, 2021, 3:26 pm

i suggest mullvad.net. Worth to buy.

Royal ! - June 20, 2021, 3:51 pm

nVPN I guess offers port forwarding feature.

Eladictocosity - June 28, 2021, 12:00 pm

nVpn does offer port opening.

Robbin - October 2, 2021, 5:19 am

(Jun 28, 2021 12:00 PM)Eladictocosity Wrote: [\[CITE\]](#) nVpn does offer port opening. But appearently no Static Ports.

Their website (<https://nvpn.net/>) says:

+] Portforward - open the ports of your desire in our client area, ports are then opened instantly & automatically without any delay! (No more need to Portforward in your router.)

BUT in their FAQs:

Since as of 21.12.2019 we are no longer able to allow Static Portforwarding on all of our VPN locations by default. Static Ports are problematic, because in 90% of cases they are only used for Malware / RATs and similar Software's all the time anyways. That being said: we do not care what our users are doing, but due to the fact we have lost around 30+ servers over the years and all of those only related due to Malware usage, this had to be changed now. Not to forget alot of our IPs have been added to Spamhaus blacklist

So, which VPN is these days still offering Port Forwarding with Static Ports? I am eager to buy. Is OSVPN a candidate?

bombastic509 - October 4, 2021, 4:29 pm

VPNs with static port forwarding:

PureVPN*

TorGuard

Windscribe*

PerfectPrivacy

IvacyVPN*

VPNs with no NAT firewall (All ports are open):

VyprVPN (NAT can be disabled from settings)

FrootVPN

VPNs with dynamic port forwarding (the port is randomly chosen):

MullvadVPN

PrivateVPN

PrivateInternetAccess

IVPN

nVPN

* indicates that port forwarding has an additional cost

the cheapest one among those is VyprVPN at only \$60 for 36 months, but "the cheapest" doesn't mean it has "the best value". you should always do your research on which one is more suitable for your needs

How do you go about using the dynamic port forwarding for these such as PIA?

__Digital__ - October 10, 2021, 12:48 pm

Honestly your better off spending the 5.00/mo for a vps in a country which don't comply with yours like iceland for example and follow my tutorial to setup your own.
