I have been a member of Apex Sports Betting since day one when the previous owner started it. Overall my experience has been pretty good. We've had two analysts up until a few weeks ago, now we only have the original which specializes in Football. The new owner has said new analysts is possible, so that's good. I have made good money using tips from Apex. Up until about the last month, things were going fairly well. Until we started a long losing streak, which usually does not happen. I have been told it could be blamed on members of the group pressuring our analyst for higher odd bets. I actually don't put in on every tip, so I could see where the people that participated in the long losing streak would have some negative things to say. But, since the losing streak, there is new ownership of Apex Sports Betting, and our analyst is going back to his original betting methods.

Will I join back when my premium membership ends? I honestly can't say, and that is not anything to do with Apex but I think I am going to take a break from sports betting for a little bit. However, when I get back into the scene I will be seeing what Apex is up too.

I would recommend trying Apex if you have ever been interested in getting into sports betting. Just remember to always use proper money management, bet safe, do a little of your own research as well.

Hello, I have a question. I am very interested in buying your betting service, however my identity is consistently flagged on betting sites and ends up requiring manual verification...this is a big ass headache. Can you tell me your recommended betting site/sites so that I may get myself setup first, so when I purchase your pick service I am entirely able to begin betting? Thank you. Feel free to PM me.

Review

I'm completely new and unfamiliar to sports and sports betting as a person could possibly get and I recommend this service to anyone including those completely out of their depth as well. I'm in the US and ran into trouble at first finding a sports booker I could access but Bluffer and Joker have been exceptionally patient, helpful and friendly in guiding someone like me to be able to utilize this service completely. Every single question I've had they've answered in a timely manner without a speck of irritation too which is incredibly rare in today's world so it made me feel extra confident in the quality of this service and I was right to trust it. So far, both rounds of tips I've gotten have been

winners. Since I'm so new I was betting incredibly small amounts to get more familiar with the concept and sports booking platforms but money is money.

<https://imgur.com/a/pxWVOW1>

Another gem of this service imo is the money management/bankroll system they have which has lead me to understand this can seriously become a nice source of income that we can damn near count on which is why I'm definitely going to be scaling. It just makes logical sense and you'll understand what I mean when you see it. It seriously changed how I view all gambling (cept slots lol) and how we overcome the luck aspect of it. Seriously 10/10 service for that reason alone. Thanks Bluffer!

[Price Changes Coming]

As previously noted, our prices are set to change and increase as we further prove our quality. The true value of this service is more than double what it's currently priced at, however to show gratitude for those who trust us early on, we will keep the current price that you buy at as long as you renew your subscription with no less than a 7 day gap.

That being said, as of July 20, 2021, our prices will be increasing from \$24.99 / month to \$29.99 a month. They will further increase later on several times as we grow. We also plan to expand our service in the future and have more tipsters on board. Again, if you pay \$24.99 or \$29.99 now (and renew), you will also pay that in a few months when the price for new members is double what it is currently.

So don't hesitate further, start a contract and send me a message on Discord to buy now!

I personally don't really vouch for much but THIS is definitely something I'd scream from the rooftops to all my friends that are serious about getting into sports betting, currently I'm not at my PC so can't post proof of earnings; however, I've made 1.3k in the 15-20 days I've been with them. There's been days where I thought I completely blew my money on this service but their money management system is built so that at the end, you, the consumer don't lose. It may take 4 days to make a profit but at the end, you made that profit! From there it's just a rinse and repeat. Thank you Bluffer for bringing an amazing service like Apex to HF!

I just want to remind everyone that for this month only you will get both these tipsters for the one price of \$34.99. However going forward there will be price changes and maybe even price format changes. So if you want to take advantage of this or even get a multi month deal this month, you will then have both tipsters for the duration of that subscription.

EnG1ne - February 12, 2022, 7:32 am

Been a member since December, initially lost my whole balance due to lacking proper money management but if you manage your balance properly to sustain up to 5 losses in a row, you will always end up profiting.

Counting the initial loss and the second deposit, I am up around ~78% in less than 3 months.

Absolutely recommend this service if you can be disciplined enough to manage your money well. Incredible value.

Bluffer - February 13, 2022, 5:07 pm

6 of our last 7 bets from main tipster have been wins. Doing extremely well right now!

We are 6-1 since February 5th from our main tipster.

As of February 20 2022, our price will be \$44.99 / month.

Hey there. Unfortunately we don't have any plans to add UFC. We aren't going to specifically target any particular sport as only the quality of the tips actually matters than what the actual sport is.

Personally I don't even care for Soccer but it's by far the best money maker. Shoot me a message if I can answer any questions for you! Bluffer#1364

We are planning to continue tips after the world cup. However the only way that will happen is if sales sustain themselves so that our service can continue to operate.

Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

paidmax - April 19, 2023, 4:28 am

How often do you update your stats, is it up to date? predictions are delivered only on discord or any other channel like telegram?

With my next salary I'll give it a try

lulzcat - April 19, 2023, 4:30 pm

I'm not a gambler so I was a bit overwhelmed by all the different options you can place bets on but that was quickly resolved and explained to me in a good manner. I've only followed one prediction so far and it was a win.

The level of professionalism of Bluffer and his Partner is paramount. I've never used a service (And I've purchased ALOT) from HF that rivals their level of support and professionalism. They explain their money management system and appear to always have your best interests at heart when placing bets.

So far I'm happy with the service and looking forward to today's prediction. I'll keep updating with wins/losses as I proceed through the month.

EDIT: I also accidentally sent payment before the contract was accepted. As well as intentionally sent extra and they immediately asked if they wanted me to return the amount sent, and accepted the contract. That should also give you some insight into their morals.

Do not ask my customers for recent stats. The day to day stats are completely irrelevant. What matters is a proper money management strategy and long term success.

paidmax - April 29, 2023, 9:29 pm

No problem. But please post all stats and not just the winning streaks and play hide and seek in bad times. I asked you a page before and you didn't answer me in any way. The day to day stats are irrelevant for your recent customers, it's right. But it shows me how sellers doing their business.

Every betting group has bad times, I know. I'm in 3 and still filter the best for me. Not who has the best marketing on good times but the honest also on bad times.

i have been subscribed to this service since 6th of april the tipster is good and the bets are good but the spreadsheets are completely false and misleading he puts 2 tips a day one main and one bonus he suggests that new members should follow the main bets only but on the spreadsheets he puts it as a loss only if both bets lost

in the spreadsheets he puts it as a loss only if both bets are lost other than that he puts the day as won

for example in the month i have been subscribed to i had 16 losses and 14 wins which is a negative winrate if u check the spreadsheets on discord you would find that not true at all .. and when i asked for the reason he said that spreadsheets doesnt matter and only focus on the winnings and that it doesn't matter if he had 20 bets won or loss .. i don't mean to trash on the service again the service it self is good but just misleading spreadsheets

with that being said i wanna point out that with his money management system

on the month i had 14 wins 16 losses and i am up in \$ just very little since we ended the month in a winning streak but i am still up so i am happy with the service just hated the misleading spreadsheets i just hoped that new members know that before joining this
