Thread: [Hi, Im Chicken Joe. Aspiring to secure that bag](#)

ChickenJoe123 - June 12, 2021, 12:49 am

Hello HF community. I am Chicken Joe, and I just wanted to introduce myself to everyone and provide a little description of myself and how I could be useful.

I'm from a third-world country, struggling in middle class poverty, but have IT skills and have a little work experience in the deep web. I've worked on a previous e-book operation (just as the thumbs, essentially), and now I'm looking to diversify my skills into e-whoring and other related activities.

Feel free to PM or reply to this thread to get into contact with me over any future business prospects
