Thread: [Bitcoin Faucet CPA Landing Page](#)

Palms - June 17, 2021, 9:23 am

Hello!

I am looking to sell my basic landing page which i've been using for CPA in the past.

The LP is fully mobile responsive and easy customizable, but it definitely requires some frontend changes to look better.. Otherwise its working perfectly!

[

The landing page supports by default the following networks:

Adludum

AdWorkMedia

AdsArmy

CPABuild

CPAGrip

OGAds

The script will track the real time price of the Bitcoin, started offers, completed offers and will simulate "adding" the bitcoin reward to their balance upon completing an offer from your network.

The LP is pretty much ready to be used - all you have to do is to replace the affiliate or offer API with yours and I have included a complete guide how to do it for every network!

Price

\$14,99 USD

Accepting crypto only

[contract=tid]Start Contract[/contract].

Does purchasing means we will get requires changes with it?

Or it's up to the customer to master his craft after buying?

No it doesnt, you can do it manually if u are looking to pay ur users but its a CPA landing page which idea is to make ppl download the games or complete the offers from ur network's affiliate link.
