Hi,

I told you to check the details of the mail tester. The reason it is not 10/10 it's because your domain is new. I offered you my domain which is over a year already but you choose to use yours which is a new domain that's why the score is only 8.7/10.

About your gmail. i deleted the gmail configuration on that domain because you can't have 2 mx from different smtp server with 2 different dmarc, 2 different dkim and 2 different spf.

I advice you read about how smtp works before you complain about a service not working.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
