Thread: [How to connect to HOME PC from work? Remote Desktop Connection](#)

QuestionAsker95 - June 21, 2021, 4:00 am

Windows remote desktop doesnt work on my work pc unfortunately cus its win10 home
any alternatives?

i need high performance

johnny004 - February 21, 2024, 11:19 am

you can use ssh clients on Windows like, PuTTY, mRemtoeNG.

V?rt - February 21, 2024, 11:44 am

Chrome remote desktop is a thing as well. You can give that a try. Works pretty well for me.

HALx86 - February 21, 2024, 8:22 pm

Used to work with someone who would use Apache Guacamole to connect to his home PC to get past work's firewall.

I think, TeamViewer is better choice, because it is a popular remote access software that allows you to connect to your home PC from anywhere. You will need to install TeamViewer on both your home and work computers, and then you can use it to establish a remote connection.

sam002 - April 2, 2024, 6:20 pm

PuTTY is the best option to establish secure remote connection between two systems. It allow you to connect to Home PC from your office PC to perform operation on it. To know how to establish the connection [click here](#).

Yea i think teamviewer would be a great option if you instal it on both pcs you can conect when you want

Rs6 - April 3, 2024, 9:03 am

Anydesk for me is the best alternative.
