sure

your best friend is wikipedia and google: https://en.wikipedia.org/wiki/Intellectual_disability

People with Severe (IQ 20–34). accounting for 3.5% of persons with ID or Profound ID (IQ 19 or below) accounting for 1.5% of persons with ID need more intensive support and supervision for their entire lives. They may learn some ADLs, but an intellectual disability is considered severe or profound when individuals are unable to independently care for themselves without ongoing significant assistance from a caregiver throughout adulthood.[8] Individuals with profound ID are completely dependent on others for all ADLs and to maintain their physical health and safety. They may be able to learn to participate in some of these activities to a limited degree

How can you tell a Gmail password from a Gmail ID? Except you want to spread a malware to an intended account, that way it reports to a bot.
