Thread: [\(22 SPAM posts\) Block / Remove SPAM from Members.](#)

Lorem Ipsum - June 26, 2021, 6:43 am

I reported this guy a few times already today, as I noticed that all 22 posts are literally copied & pasted.

Spoiler [\(Click to View\)](#)

Member in question is banned already;

I guess there is no need for a SPAM blocker / remover, Staff is doing a fast job!

He's a new member and I'm unsure if it's possible for a Forum to do this, but my suggestion; Block or Remove SPAM (copied & pasted content) from members with less than days of sign-up (login / posts / etc).

I'm unsure if this is something you can program, or even detect for that matter without any manual work..

That way the amount of reports could be lowered and the urge of new members to try HF as their scam-playground will be over. I'm not sure if this is possible, or even liked, but I felt like sharing this.

---- Update; ----

Another member SPAM'ing HF with the same copy & paste bullshit.

<https://hackforums.net/search.php?action=results&sid=7ebeabb5a98e49691c9421462d99c25a>

He's posting the same bullsh*t every single minute.

It's not a problem how we currently deal with spam.
