Found this game yesterday, it's in early access on Steam and is already a pretty good game. It's singleplayer, but you can see the 'phantoms' of previous players who have attempted the level you're playing. Every level is randomly generated and until someone completes it, you'll see phantoms of everyone else who died trying.

That's seriously really cool, I especially love the phantom mechanic you mentioned, very unique. I'll pick this one up on Steam when I get paid, thanks!

Definitely worth checking out if you're into these kind of games. Reminds me of playing Crash Bandicoot.
