Thread: [The UK/US government are trying to murder me.](#)

STGZ - June 27, 2021, 10:43 pm

I'm not talking about what they've done up to now. I'm not talking about how after all they've done, they are trying to throw me into fame pedophile world. I'm not talking about the mental hospitals.

They know there is a serious problem and this should end today. Yet they're not. They're not only murdering me. They will murder multiple people.

I guess with coronavirus they need to 'contribute' to the world finally, and look like they actually care/are doing something.

But the truth is they all only care about themselves. It's kinda natural for a human to be like this.

They are all the same... fame humans... celebrities are gay sex workers. And that's the truth. They are all the master fakes/manipulators. Yet all they do with their incredible influence is promote themselves & do pedophilia activism (hidden, but it's there waiting for the big reveal that gays are in fact pedophiles)

I have been suffering a long time. No one knows how strong I am. I am not like them. I am not like these fame pedo clowns that do not care about anything.

They had their chance with me, now I will self destruct and talk myself into deep depression while I wait another 5 years to be freed from this hell.

THEY NEED TO ACT NOW. I can't stress it enough. I have. But I can't keep talking. Thanks.

Didn't you have a breakdown over a similar topic on another account in the past?
