Thread: [Programming service | Automating stuff with Python | Homework](#)

Djangoo - June 28, 2021, 3:39 am

Hello, If you want to get some repetitive task automated, or you want any kind of help in your homework, then you're at the right place. We will decide on the price of the project depending on the energy I will have to put in that project.

ToSI offer no refunds.

I take 25% advance money in the beginning in order to avoid any scam and confirm if you're serious about the project.

Please specify all the requirements clearly in the beginning, I won't do anything more than specified in the requirements.

[contract=tid]Start Contract[/contract]

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Hi milpsych, explain each step properly in detail on how you're performing the task manually. This would give me an idea if the automation is possible and how it can be achieved. You can send these details over dm.
