Like the others have said, any chance of a 7-day trial? \$25 for a test to buy the \$120 seems like a steep gamble with no one posting any reviews and just constantly bumping. Have my free pennies.

Edit: See review on Page 2.

+ Vouch. I decided to just purchase this directly and test it out. So far everything is working as expected. I purchased proxies through two different vendors and are working. Views going from 100-1000 is so satisfying. The developer has even reached out and personally assisted with setup when I had some mis-configurations. Really impressive software being able to create accounts, test proxies, follow bot / chat bot / view bot / vod bot / etc. It really does it all. I would recommend it if your looking to boost your twitch or youtube channel. Don't get scared off by the lack of engagement from the HF community the do have a discord and it's active. I bought the lifetime license and look forward to using it at least for a year if not longer for personal use.
