Good for you man!

Congrats man, that's awesome!

Been looking into this myself for a few months. Found a strategy with Heikin Ashi and Parabolic SAR that I like but I'm not confident enough to put anything over \$1000 into the market yet.

Well done! That's some impressive money for 'just' trading as a non-full time job.

I noticed you are using Binance, if I'm correct. If so, do you have that Visa card as well?
I am using it for small transactions or withdrawing cash whenever I feel like.
But if you have some tips on why I should leave my money at the card, Binance or 'stake' I'd love to hear that.

I'm so scared of trying this shit. I'm so risk averse but maybe that's damaging where I could be. All I've done is sink every penny into my mortgage into the house I live in.
