Firstly 4 of the currencies are worth 0, half of the currencies don't even change value, I bought 50k doge to check if prices changed on it but I got 51.5k doge instead of 50k and now I can't even sell it.

Bugged prices in a lot of coins in the crypto game been reported before and they're aware of it <https://hackforums.net/showthread.php?tid=6152859>

Regarding you not being able to sell, i'm pretty sure there's a restriction where you can't sell if the change % is above a certain level.

It says I purchased 51.5k DOGE but I typed 50000, it bought as much as it can so I was left with 0 bytes.

Well looks like you sold a coin then bought DOGE 4min later. Assuming you it was Doge that you sold then bought again, are you sure you hit sell all? or was it another coin that you sold?

I bought 13k bytes worth of SRM yesterday, realised today it was broken, sold my SRM, bought 50k DOGE an hour ago but it bought 51.5k and I just sold it.

My only guess is that you wrote 50k then hit "Purchase All" instead of "Purchase" that's why you went back to 0 bytes
