Hello Hi Hey,

Are you a creator looking to make money,
or a Business looking to grow your income?

I have the solution for you,
Farming.

We will start by getting your location/niche and scraping all the cities nearby top/recent posters followers.

Once we have gathered a sufficient amount we can deliver via various marketing farming methods. The network you ask of which is in persuit? margatsn! The biggest followed page is the network itself 400m+.

Thus proves atleast 400m real active people are using this platform and are sourceable.

Youtube, FaceBook don't compete. If you want to be #1 and want to tap in with the #1 provider at your own rate beating any provider now is your chance.

Start Re-Directing for in-come, Get paid via IGTV posting(s) views (the new meta youtube), even get paid via going live and earning ig badges from purchases.

How much can we meet delivery amounts? We can start from your location/niche and expand outwards from closest out.

How fast can we provide ads to faces? We provide concurrent deliveries via ads to faces, we have multiple devices meeting the demand of supply thus multiple people can see your add per second via the delivery times.

pricing

18.99/30 Continuous days of service

Including 3 delivery times daily! of 1,000x+ people per round!

Best regards,

The Real Are In Tune??
