This is incoming adds right? Which i mean by that is you create the [BRAND NAME REMOVED] accounts (girl accounts) either manually or using bot and let the guy add/message you first right? This is not like some shit people been selling nowadays where they manually add the Snapchat username or sell a list of Snapchat username right?

Of course it isn't manually added, I wouldn't have the time or nerves for that.

All adds are incoming adds from [BRAND NAME REMOVED] that will be added back before you get the account. Which you'll get to easily check on the account.
