Thread: ["Connection Attempt" in BitRats connection logs](#)

SIM-5043056 - July 6, 2021, 3:32 am

so i bought BitRat and after setting everything up i tested it on two friends

friend one ran it and he connected to it for about 30 seconds then disconnected and now it just gives me "Connection Attempt"

friend two cant even connect all it says is "Connection Attempt" in the connection logs

does anyone have a fix for this?

are you running bitrat on RDP? If yes then you see "connection attempts" because somebody is just scanning your server on different ports, thats common, nothing to worry about
