Thread: [Remote Mouse GUI 3.008 | Local Privilege Escalation Exploit | CVE: 2021-35448](#)

Mitch - July 12, 2021, 7:42 am

Code 1. Open Remote Mouse from the system tray

2. Go to "Settings"
3. Click "Change..." in "Image Transfer Folder" section
4. "Save As" prompt will appear
5. Enter "C:\Windows\System32\cmd.exe" in the address bar
6. A new command prompt is spawned with Administrator privileges

Credit to Exploit Author:

Exploit Author: Salman Asad (@deathflash1411, salman@defmax.io)

Date: 17.06.2021

Version: Remote Mouse 3.008

Tested on: Windows 10 Pro Version 21H1
