Thread: [Going into surgery today!](#)

Vitani's Mate - July 12, 2021, 8:28 am

Well it is tomorrow because it is still 11:30pm here but I have go around 5:30am out the door because admission time is around 6:30am.

Long story short. I had a kidney stone that caused a shit ton of trouble for me. Caused an infection and I already had a operation to remove it and now this operation is to remove the stone itself from the body and to remove the stint that has helped me pass urine properly. Hopefully this will be the end of the pain and suffering that I have gone through.

I've been in a lot of pain this past month and a half. =/

Oh yeah tomorrow is your scheduled date of operation I remember bro...good luck and be optimistic that everything will be going great eventually.

Praying for you bro that the operation will be done pretty quick and a successful one. God bless.

They go straight in the pee pee hole, use a laser or some doohicky thing to break it up and catch it in a little basket thing and pull it all out and of course I will be asleep through all this thank fuck.

After I had the surgery for infection I had a catheter coming out of the pisshole to drain all the bad shit.

I had to spend a night in hospital with it in and I couldn't sleep because it was so uncomfortable and when they pulled it out.. It didn't feel that great.

How long would that catheter be there bro? I wonder how many days would you be feeling some pain?

popZmoke - July 12, 2021, 8:44 am

Hey OP, that sucks but you should be grateful for the life you have. You actually have doctors that can take care of your pain, I don't think you realise this.

Also gl with ur operation

They pulled it out next day.

For a few days I was pissing red because of the stint and I still piss red because I still have it in.

They say it is normal to piss blood because of it and it made my cock hurt quite a bit as well.

No not really..

But I know the stone was probably caused by me drinking a lot of coke and energy drinks and also having a lot of food that contained a ton of sodium such as fast food, I am avoiding those types of things as much as I can, well I am still be able to have these but not a lot. lol

Before this I used to drink coke and anywhere from 2 to 5 cans of energy drinks a day for the past 13 years and I used to have fast food everyday for the past 8 years. I am actually surprised that I am not dead yet with the shit I have put in my body.
