Thread: [LEFTYS - #1 MASS EMAIL SENDING | NO LIMIT | IP ROTATION | BYPASS SPAM | OFFICE 365](#)

Lefty - July 12, 2021, 9:33 pm

I have seen a few mailers being posted here, with no support to the customer.
I am working on bringing stable, cheap applications to Hack Forums after all the help I have got from here.
With a basic one-time payment you get, Unlimited Bandwidth & Sending, HTML Enabled Messages & Cloud Server Rotation

I'm asking for a one time fee of £10 (UK) for Unlimited Usage & Updates for future products.
Please add me on Discord at Lefty#2625 .. Look forward to hearing from you!

It would be amazing if this were web based, and I'd definitely be interested.

I can certainly work on that, I have considered it but I need to learn a bit more about SQL and certain things I need to make it right

I understand. Let me know if you do get a web based version up. I feel like you could sell weekly/monthly subscriptions if web based also. I'd be happy to be the first subscriber. ?

Sounds like a plan! ?

Hey this looks dope. Is there better proof you can show than what you posted? Looks like an interesting application. I guess you have your own proxies that it auto rotates. How often do you rotate proxies and are they dedicated private proxies? Is this enough to support hundreds of

thousands of emails? Can your SMTP support that?

Lefty - July 12, 2021, 10:14 pm

I can maybe put a quick video together or something :)

In regards to how I rotate the servers and if they can handle a really mass emailing campaign. I have a few different cloud based services independent from each other to send emails via two different methods, Standard Private STMP services and RDP Cloud Based Servers which grant a faster and higher rate of inboxing from spoof emails and generally are seen as whitelisted by email companies.

add me on discord if you have anymore questions :)

Replied :) I hope you are still online

Stanley - July 13, 2021, 7:04 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
