Thread: [Cx Coin - founded by controversial streamer \(Ice Poseidon\)](#)

w1seh2nds - July 18, 2021, 9:16 am

cxcoin.net

He will be launching a donation platform where viewers will exclusively donate using crypto.

white paper is on the website, as well as other important information.

Ive been closely following his telegram as he is actively almost everyday on vc and chat. Where he answers almost every question.

What has lead me to invest and hodl, is the upcoming major ad on "btok" that will go live in 20th july btok is a major chinese crypto social media.

price has it the floor, it isnt a better price to invest right now.

Unbiased thoughts on this coin? Also i am aware of the trolls on twitter saying its a scam, who knows what happens next .

not financial advice, this coin is extremely volatile and risky right now, DYOR

x_x - July 18, 2021, 9:19 am

they aren't trolls, it is almost certain it is a scam.

w1seh2nds - July 18, 2021, 9:20 am

price of coin as of now, 2.003E-9 or 0.000000002003

Major marketing hasnt started, he hasnt posted on twitter or made a specific stream to encourage his viewers to invest. His reason for that is "Market will be extremely volatile in the first week, and he doesnt want new comers getting dumped on"

Careful shilling shitcoins on the forum.

Maybe be a little open minded? what if this shitcoin works out

Goodluck, I will not be investing in it.

BalleJatta - July 18, 2021, 9:45 am

People like you assures me that the real dip hasn't even started yet.

I am also closely following this coin. I'm on the telegram daily and the owner of the coin is also daily in the Voice Chat.

Invested a small amount in it as I see a possibility where the coin does well once the marketing fund starts being used and the donation platform will be in effect.

Ice plans on accepting donations exclusively only with CX Coin and the platform will be very user friendly so the average donator doesn't have to go through the whole process of buying and sending the coin.

Ice also plans to use his influencer power and connections he has with other popular streamers and he will use the marketing fund to pay streamers to exclusively accept donations in CX Coin. Every donation is essentially a buy.

Of course the whole plan can also fail but since its literally the lowest it can be right now and not many people know about the future of it, I saw that it was worth a gamble at investing in it right now, and see where it goes.

Invulnerability - July 18, 2021, 10:05 am

When I see a dog image on the website, I know it is a shit coin

So the average donator doesn't have to go through the whole process of buying and sending the coin. So where does the coin come from thin air? Most influencers likely already take ETH / BTC, there is slim to none chance that streamers will accept CX coin from a guy who is BANNED from twitch.

Apparently you do. Whales haven't sold yet.

There's no reason for this coin to exist. Not a single one. All of this could be done with any other already existing platform or exists already.

No need for this shitty token other than to dump on investors.

Take a look at the roadmap and tell me that you think that's still a legit project:

Aggressive marketing before actually building the product?

Compare it to any other BSC scam coin and you won't find a difference, it's exactly the same. No actual use case which needs its own token, Binance Scam Chain, Deflationary (just why?), Tokenomics sucks

People have been banned for posting threads like yours.

Zoomers - July 18, 2021, 11:46 am

Everything on BSC is a pump and dump or an elaborate scam. From what I've seen, I have yet to see anyone attempt to build something that isn't a cash grab

darkair - July 18, 2021, 12:14 pm

the coin is going nowhere, ICE made money and his team, and the presale people dumped as much as they can, you're saying "whales aren't out yet" like it's a good thing? LMAO that means the price is only going to go down from here onwards, I asked "Guys what happens when 2500 bnb of the presale people dump on launch" and got kicked from the telegram, you don't believe me yet do you?

hear it from the man himself, ICE says that he was planning to dump from the get go

<https://twitter.com/MeanLeaf/status/1414768055201193985>

that twitter video is proof that you got played, I'm sorry my guy, there are thousands of solutions to donate through crypto already, this isn't revolutionary don't be so naive my guy, any coin on BSC is a pump and dump, yes of course some coins moon, but those are fair launches and community tokens, this token was made to fill ICE's pockets, I watch ICE gamble on youtube and I'm a fan of course, but trust me, you got played

guys the founder is online on telegram, feel free to ask any questions directly.

How is it out of context? He ranted about how shitcoins were junk scams and how he would scam the fuck out everyone if he had made one of those shitcoins. Fast forward to today he's doing it.

I think a close of thread and a ban should suffice.

Deno - July 18, 2021, 8:38 pm

trust me, for the first few hours u will see gains and after that it's dump.

donation coins and dog coins are always like that, only those owners & buyers at presale will gain

Fammo you can literally see where they deployed the contract and took 900t out of the 1 quad trillion supply (

<https://bscscan.com/tx/0xa591a68dc770f4d1d0f5f67b76cdbea4ae2fa3d49646131b2b99028a4882c8dc>) then only burned 100t (

<https://bscscan.com/tx/0x094b78d5de38bc1a179b03a3bf12fbd278d02a53f3449471ae780b04d00d606a>) then sent off the remaining 800t to plenty of different addresses a couple of times minimizing the amounts and sold off a pretty good bit which is why it has crashed.

If you actually believe in this shit then you're fucking retarded, pretty sad I used to watch Ice didn't think he was this shitty.

Net - July 20, 2021, 12:02 am

Ice Poseidon is the founder = Biggest red flag I've seen in a while.

No way this will work out.
