Thread: [Buying BSC SMART CONTRACT token sniper. Big budget.](#)

Hello guys.

I hope to find a skilled coder on here. I am looking for a super fast sniping bot to get into the first transaction of dxsale fairlaunches and normal fairlaunches.

I have a fullnode setup already on a VPS.

I am not looking for a cheap tool, only people with EXPERIENCE contact me.

It should be on level with this famous sniper: He is one of the fastest sniper on BSC:

bscscan.com/tx/0xadfda6d6a9c6eaf83e999a05bee1c5f5ec82451e7a0c80a21afd4afa0ff9a356

Look at his input data 0xd98a9469 his buys always just shows as this. The bot should copy liq gwei and get in the same block. Because if it uses too much gas it will frontfrun liquidity. His bot can even change the contract's router to snipe other amm and has anti honeypot feature.

This botter was actually faster than him on DogeBTC fair launch:

Contact me if you are skilled enough. We can discuss the payment.

Scammers stay away.
