Are you looking to make a boat load of cash?

Are you very familiar with machine learning, deep learning, or video processing?

Have you created and trained ML to watch live video and pick out items in real time?

If you answered yes to any of these, please direct message me.

No bullshit, no games, no dumb fucking ebooks. Just need someone who is skilled with building real time ML analysis

I wish I was able to help you out.

The potentials you have is tremendously.

Good luck with finding a descent partner for this project!

I mean unfortunately not.

But if you are very patient and decide to sleep for 6 months.

I'll be back then with the skillset needed.
