Nice looking thread - your website just stays loading - doesn't seem to let me access onto the actual site.

Thats odd, I will look into this, I have clients so obviously this issue isnt for everyone.

Try clicking this link: <https://hostbit.us/store/windows-rdp>

The homepage takes a while to load since I made it with mainly images since my html isnt that great.

thats good,

BTW why is your Bandwidth so expensive, additional 1TB is 18\$ which is 2x the price of RDP
