Thread: [STOP USING SELLIX! RUN YOUR OWN AUTOBUY SHOP - NO EXTERNAL ACCOUNTS!](#)

SIM-5046007 - July 22, 2021, 6:55 am

I'm opening up my script shop so anyone who cannot code can easily get their own shop up online running within a matter of no time!

There are currently only 2 projects for sale on the site which are both autobuys but one with registration and one without.

They both use crypto and paypal for payments and have been tested inside out.

<https://ridencodes.com/>

Demos for all projects can be found on the site!

Cheap as chips.... you can have you very own automated shop online for a very nice price.

Why pay for atshop, sellix, shoppy etc.?

With this, you can make the design you want!
