TO PURCHASE ADD DISCORD: jackfrost#2494 (BTC ONLY)

My partner and I got massively frustrated with losing money quite regularly on sports bets (some call it addiction) that we decided to come together and create an algorithm that decides the results for us. We've had great success with it however we restrict ourselves to small bets per day to create a steady income.

THIS IS NOT 100% PERFECT. You will lose at some point.

Not only does this program (excel based) predict the result, it also predicts o/u goals. It will pull all of the games from flashscores and soccerstand and show you in a percentage how likely the home/away team is to win. The algorithm pulls all the previous games, including where the team are in the league and goal difference. It dives a little more into the figures but we'll not give away too much.

I've been using this the last 54 days and am in profit of just below £1900 placing £5/£10 bets. If you bet higher, you win more. I'm just a bit tight with money.

Price is £40 BTC so around \$55.

This price will be going up to £80 on the 31/07/2021 so be quick!

This is a lifetime membership, you will not be asked to pay again. Once you have this predictor, it's yours and it'll continue to function every day for eternity providing football/soccer exists.

I'm well aware this is one of my first posts and don't have any popularity as of yet however I aim to change this in the future and that's by starting now. I'm more than happy to join a call with you on discord and walk you through the predictor and happy to answer any questions you may have.
