Thread: [Translate a Russian facebook username](#)

iTrade - July 22, 2021, 7:41 pm

Hello, I was sent a screenshot from someone involving a business transaction from a user on Facebook in Russia. The person who sent the screenshot doesn't know how to translate it but sent me a screenshot (I didn't want to ask him to copy and paste the username ,)

Let me know if you can do this and how much you need to be paid, not looking to pay much as as I know this is not very hard to find someone who can.

Thanks

Message me price and I'll sent the PIC if we agree. You must send me translation first.

No. Not even relatively close. I could go in a Russian chat room and do this in 30 sec for free
